ISO Certification Service Stepping Up The Game

The ATC's ISO Certification Service provides language industry expert training, auditing and certification services to language service companies across the world.

Now we are stepping up the game. In partnership with specialist ISO consultancy company Assent Risk Management, the new services and ISO standards we provide will help your company stand out from the competition with robust, quality-driven practices.

eLearning training for governance, risk and compliance from Digital Lorators will help you to implement best practice processes and to get ready for successful certification.
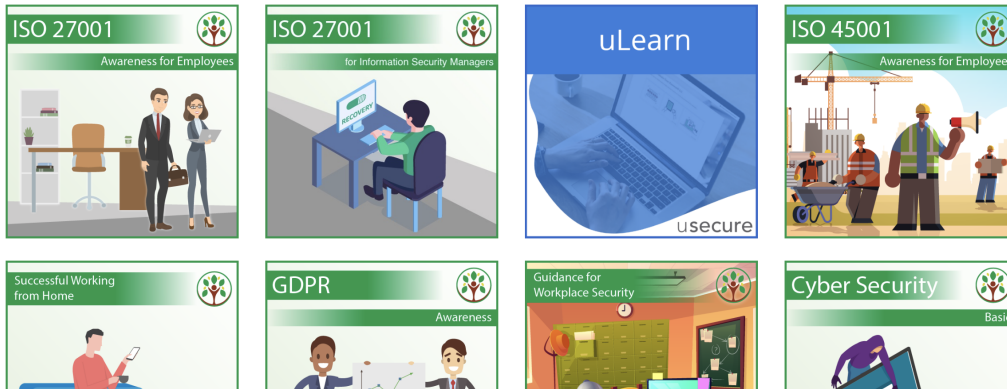

New ISO Standards

From information security to business continuity and environmental management, a certification service that understands the language services industry and your company's operations adds real value to the auditing process.
